

ALPEREN ÖZCAN

SOFTWARE DEVELOPER

During my life, I always focused on communication and getting to know other people living on the earth and myself. I have always cared about teamwork. My goal in the life is to enhance my knowledge and experience to a highest level possible and take the steps of a competent software developer with determined steps.

EDUCATION

Istanbul University

2021-Present | Management
Information Systems

Istanbul Technical University

2012-2019 | Chemical Engineering

WORK EXPERIENCE

• 2022 **Cloud Group**

Present

- Continuing to develop existing web application project
- Developing new websites.

• 2019 **Ayhan Sezer Oil and Food Industries Trading LTD.**

5 months

- Following up the process during production and product design.
- Doing efficiency research
- Determining the right strategies for production.
- Checking whether the personnel is doing their job correctly.

• 2019 **Eti Maden Operations General Directorate (Internship)**

1 month

- Observing the production of boric acid, borax, pentahydrate (Etibor-48), Borax Decahydrate, Colemanite and related process equipment.

• 2018 **Rebul Cosmetic (Internship)**

1 month

- Doing quality assurance tests to determine if the raw materials are suitable for production.

• 2012 **McDonalds, McCafe**

4 months

- Informing the customers about new goods, answering the questions and taking the payment.
- Serving customers by presenting the coffee menu and explaining its contents,
- Repairing and maintaining the equipment.

CERTIFICATES

- Oracle Certified Associate, Java SE 8 Programmer I | [See credential](#)
- KIMMTE2 2. Chemical Engineering Design Event
- AIChE Career Lab'18

SKILLS

- Java SE 8 (Oracle Certificated Java Programmer, 84/100)
- RESTful Web Services
- Spring Boot
- React.js
- MySQL
- Design Patterns
- Git & GitHub
- Bootstrap
- Maven

ACTIVITIES

- Violin performer in Classical Music ensemble
- Classical kemenche performer in Turkish Music ensemble
- Member of chess club
- Volunteering club

LANGUAGE SKILLS

- Turkish - Native
- English - Advanced
- Spanish - Basic

PROJECTS

West Qurna Oil Train Project

(Final year design project of chemical engineering)

Designing a facility which makes crude oil ready for processing, choosing related process equipment, determining the process parameters, controlling the process with a team of 5 students for 1 year.

[See project](#)

Online Health Interaction System

Developing a ReactJs - Java Spring RESTful project that users can sign up by default roles, can schedule, get, cancel appointments by using an interface.
